

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

posture: red; workstation: red

Exercise Recommendations

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with the other hand for 20 seconds each side.

Neck retractions: Gently tuck your chin and pull your head back to align ears over shoulders; hold for 5 seconds, repeat 10 times.

Upper back extension: Interlace fingers behind your head and gently arch backward, opening the chest; hold for 10 seconds.

Seated pelvic tilts: Rock your pelvis forward and backward while seated to promote awareness of neutral pelvic position.

Elbow flexor stretch: Extend your arm in front, palm down, and gently press on the back of your hand to stretch the forearm muscles.

Final Advice

Your current posture and workstation setup present high ergonomic risks, especially for your wrists and neck. Immediate workstation adjustments and posture corrections are necessary to reduce pain and prevent further injury. Prioritize using external input devices and elevating your screen. Take frequent breaks and perform the recommended exercises daily.
