

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

posture: red; workstation: red

Exercise Recommendations

Wrist stretches: Extend your arm with palm up, gently pull back fingers with the other hand for 15–30 seconds per side.

Neck retractions: Gently pull your head straight back (like making a double chin) and hold for 5 seconds, repeat 10 times.

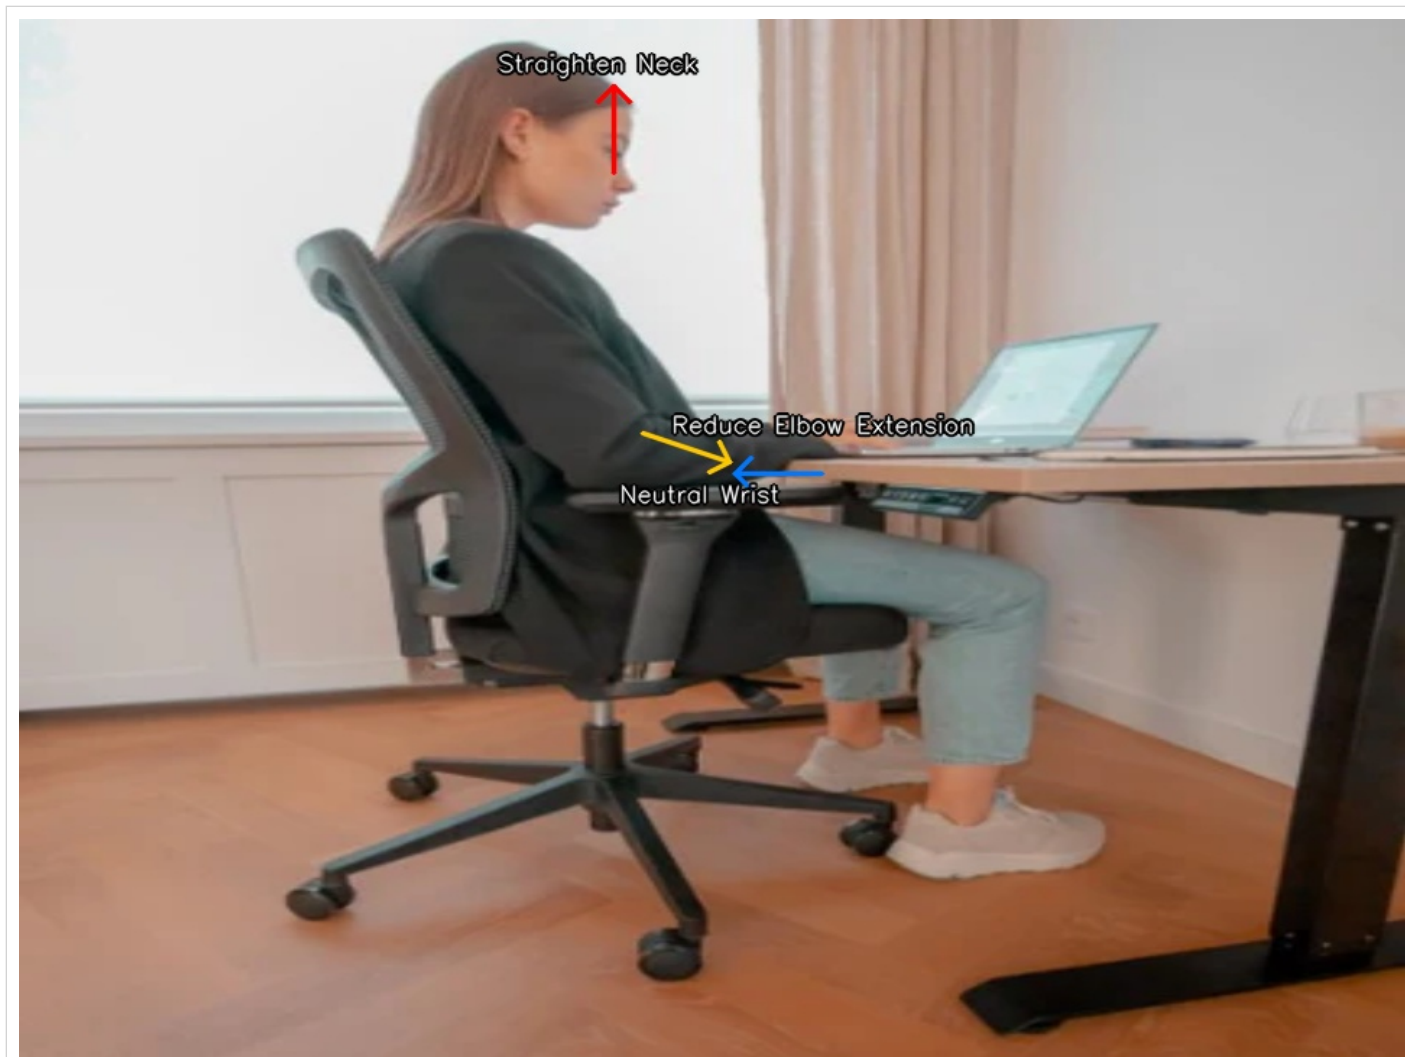

Shoulder blade squeezes: Sit upright and squeeze shoulder blades together for 5 seconds, repeat 10 times.

Seated pelvic tilts: Rock pelvis forward and backward while seated to mobilize lower back, repeat 10 times.

Forearm stretches: Extend one arm, palm down, gently press the back of your hand with the other hand to stretch forearm extensors.

Final Advice

Your current posture and workstation setup present high ergonomic risks, especially for your wrists and neck. Immediate workstation adjustments and posture corrections are essential to reduce pain and prevent further injury. Prioritize elevating your screen and using external input devices. Perform recommended exercises regularly and take breaks at least every hour.
