

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture: RED (high risk, especially for wrists/hands and neck). Workstation: RED (monitor height and input device setup are critical violations). Immediate ergonomic intervention is required.

Exercise Recommendations

Wrist stretches: Gently extend your arm, palm up, and use your other hand to pull fingers back for 15–20 seconds. Repeat both sides.

Neck retraction: Sit upright and gently pull your chin straight back (not down) to align your head over your shoulders. Hold for 5 seconds, repeat 10 times.

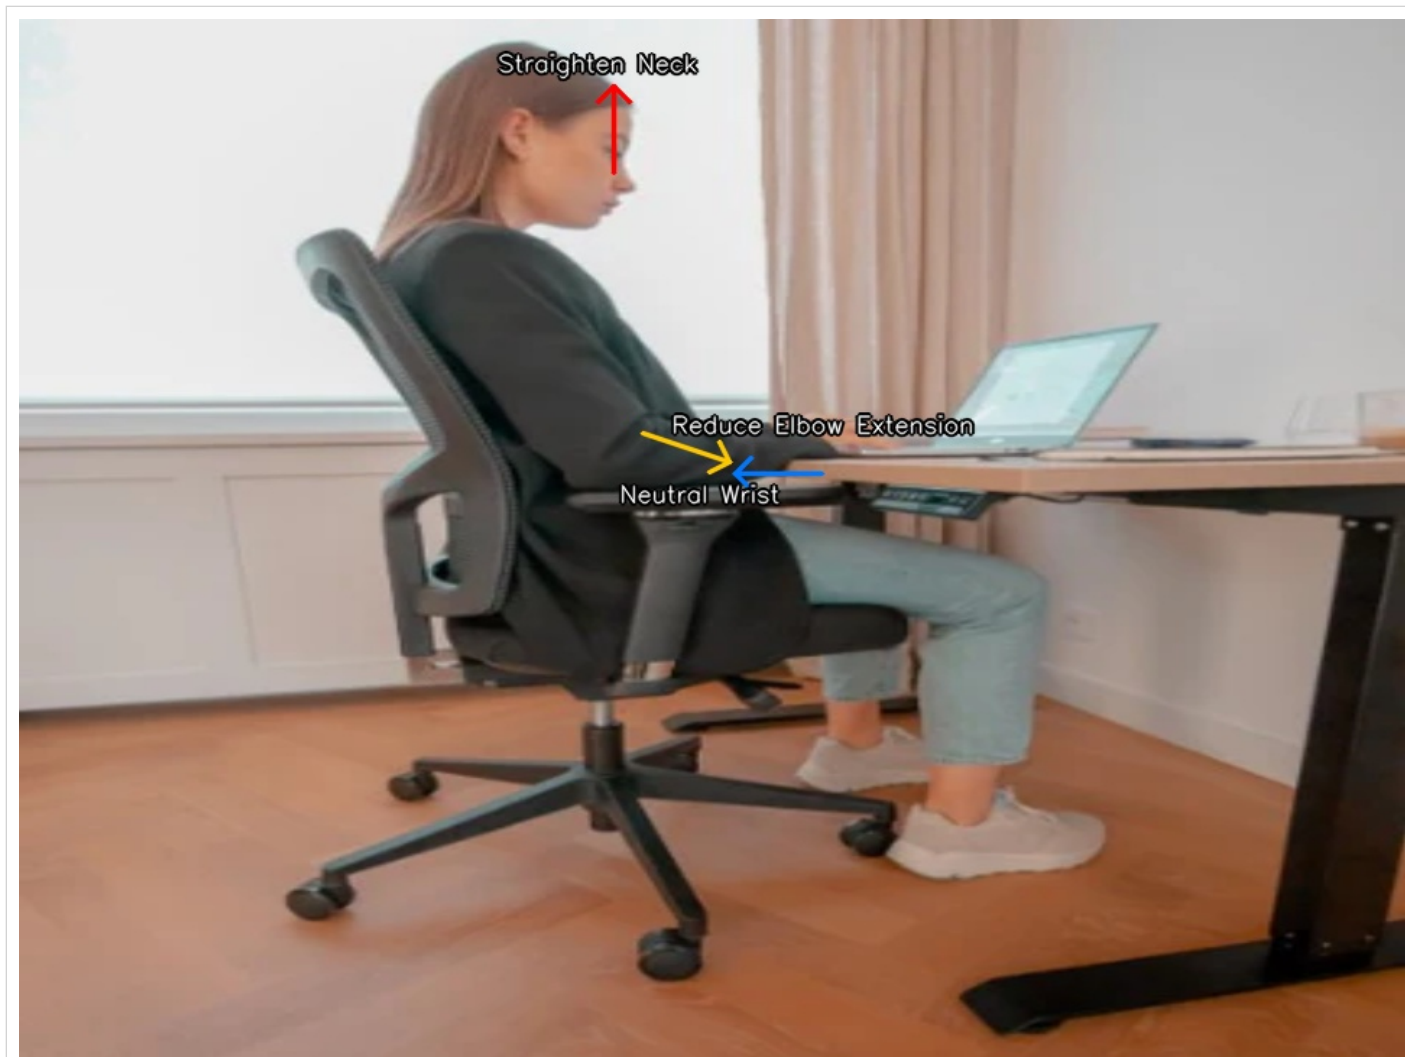

Upper back stretch: Clasp your hands in front of you and round your upper back, pushing your hands forward and shoulders apart. Hold for 20 seconds.

Shoulder rolls: Roll your shoulders up, back, and down in a circular motion 10 times to relieve tension.

Seated pelvic tilts: While sitting, gently rock your pelvis forward and backward to mobilize your lower back. Repeat 10–15 times.

Final Advice

Your current workstation and posture present significant ergonomic risks, especially for your wrists/hands and neck. Immediate adjustments to monitor height and input devices are essential. Prioritize neutral wrist and neck positions, and take frequent breaks. If pain or tingling persists, consult a healthcare professional.
