

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture risk: RED (severe neck flexion, wrist deviation, and elbow angle; high pain in wrists/hands). Workstation risk: RED (monitor height violation, lack of external input devices). Immediate ergonomic intervention is required.

Exercise Recommendations

Neck retraction: Gently pull your head straight back, keeping your chin tucked, to align your ears over your shoulders. Hold for 5 seconds, repeat 10 times.

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with your other hand to stretch the wrist flexors. Hold for 15 seconds, repeat 3 times per side.

Upper back extension: Interlace your fingers behind your head and gently arch your upper back, squeezing your shoulder blades together. Hold for 10 seconds, repeat 5 times.

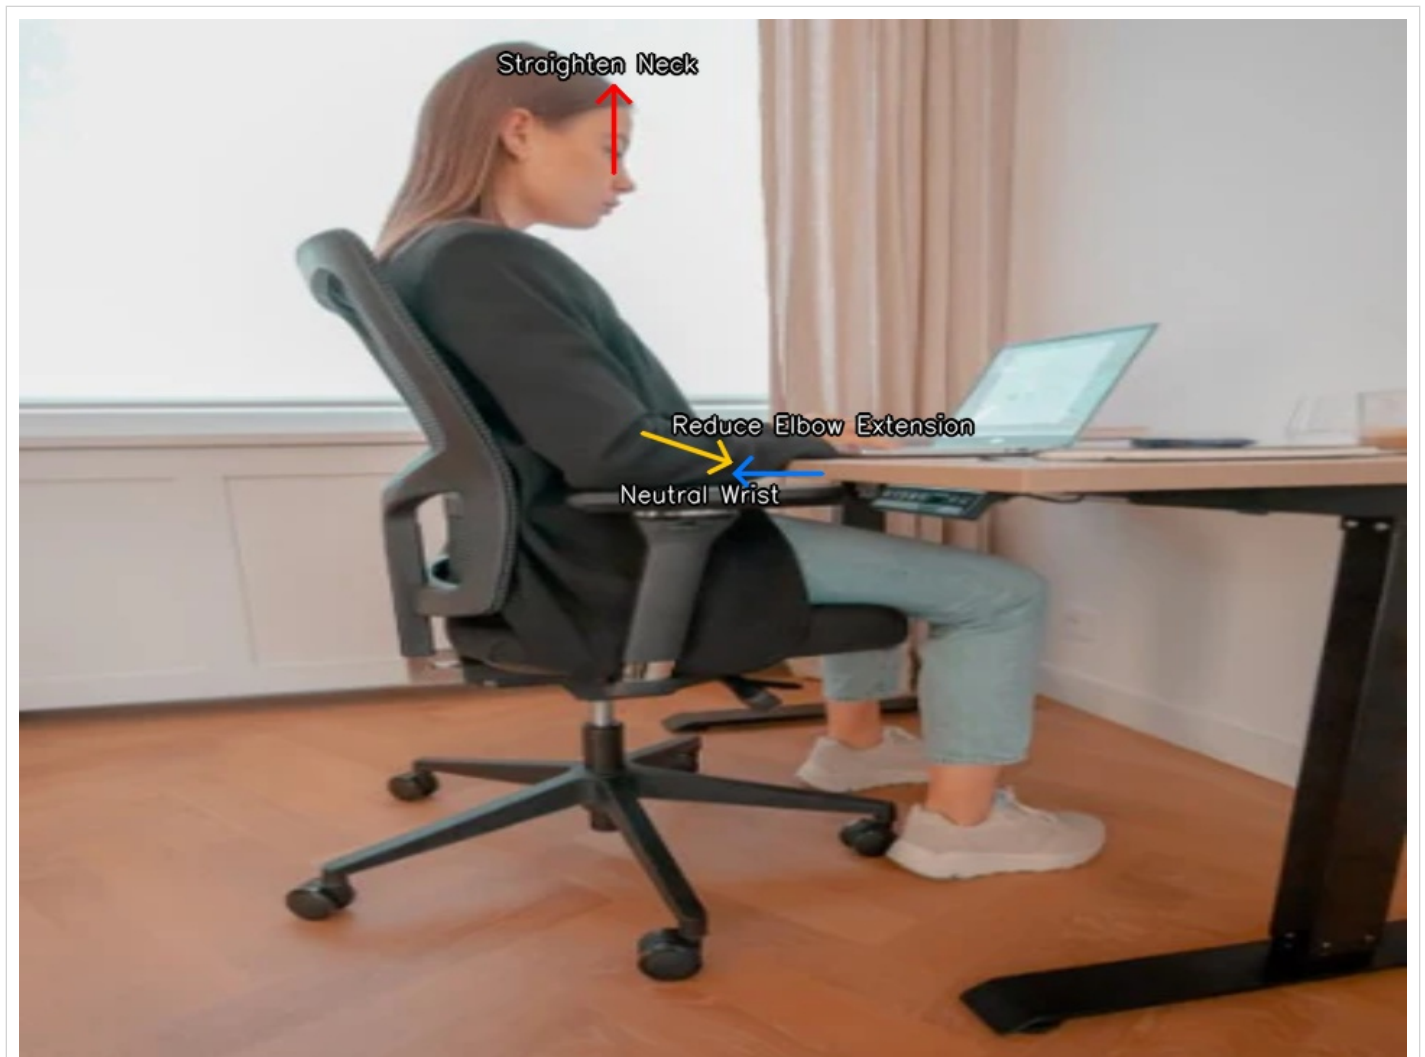

Seated pelvic tilts: While sitting, gently rock your pelvis forward and backward to mobilize your lower back. Repeat 10–15 times.

Desk shoulder rolls: Roll your shoulders up, back, and down in a circular motion to relieve tension. Repeat 10 times.

Final Advice

Your current posture and workstation setup present high ergonomic risks, especially for your wrists/hands and neck. Immediate adjustments are necessary to prevent worsening symptoms. Prioritize raising your screen, using external input devices, and correcting your posture. Incorporate regular breaks and the recommended

exercises to reduce pain and prevent injury.
