

## Ergonomics Evaluation Report

### Posture Analysis

---

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

### Workstation Analysis

---

Monitor:

- MonitorHeight: Red ( $\Delta$  118.70453041791916)
- ViewingDistance: Green ( $\Delta$  260.32965087890625)

Chair:

- SeatDepth: Green ( $\Delta$  95.02325439453125)

### Risk Summary

---

Posture: RED (high risk, especially wrists/hands and neck). Workstation: RED (monitor height and input device setup are critical violations). Immediate ergonomic intervention required.

### Exercise Recommendations

---

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with your other hand for 15–30 seconds per side.

Neck retraction: Gently tuck your chin and pull your head back to align ears over shoulders. Hold for 5 seconds, repeat 10 times.

Shoulder blade squeezes: Sit upright and squeeze your shoulder blades together, hold for 5 seconds, repeat 10 times.

Forearm stretches: Extend your arm, palm down, and gently press your hand downward with your other hand for 15–30 seconds per side.

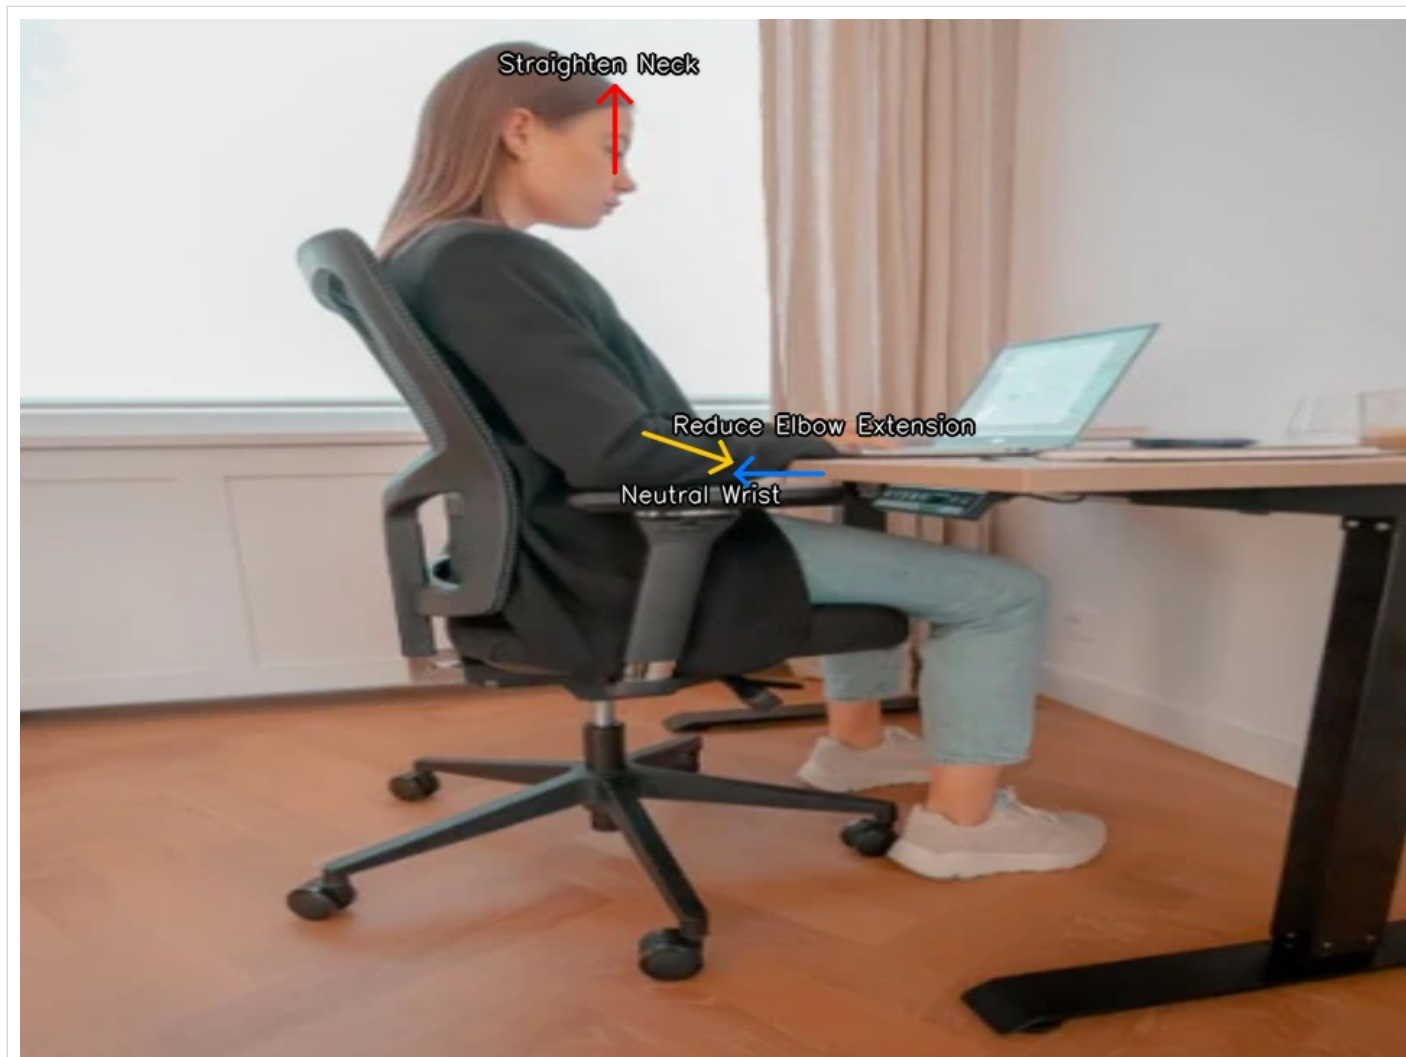

Seated spinal twist: Sit upright, cross one leg over the other, and gently twist your torso toward the crossed leg. Hold for 10–15 seconds per side.

### Final Advice

---

Your current posture and workstation setup present significant ergonomic risks, especially to your wrists/hands and neck, which aligns with your reported pain and symptoms. Immediate adjustments to monitor height and input devices are essential. Begin posture corrections and exercises daily, and seek professional ergonomic

assessment if symptoms persist or worsen.
