

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Yellow
- Wrist Deviation: Red
- Pelvic Tilt: Green

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Wrists/Hands (VAS 8)

Posture & Ergonomic Corrections

- Raise monitor by 10 cm: Elevate your laptop screen by 10 cm so the top edge is at or just below eye level. This will reduce neck flexion to within the ISO 9241-5 recommended range (0-10°), minimizing neck and upper back strain.
- Keep wrists straight during typing: Maintain a neutral wrist position (0-5° deviation) when typing. Avoid bending wrists sideways or upwards to reduce strain and tingling in wrists/hands.
- Use external keyboard 5 cm closer: Place an external keyboard 5 cm closer to your body to achieve an elbow angle near 100°, as per ISO 9241-5. This reduces upper back and wrist strain.

Final Advice

Your upper back pain is severe and combined with high neck and wrist strain. Please consult a healthcare professional if pain persists or worsens. When performing any posture exercises, move slowly and stop immediately if you feel pain or tingling.
