

# POSTURA

## Ergonomics Evaluation Report

### Posture Analysis

---

- Neck Flexion: Green
- Shoulder Elevation: Green
- Elbow Angle: Red
- Wrist Deviation: Red
- Pelvic Tilt: Yellow

### Workstation Analysis

---

- Chair: SeatDepth: Green

### Pain & Risk Summary

---

Average Pain Level: 7

Main Pain Region(s): Elbows/Forearms, Wrists/Hands (VAS 8)

### Posture & Ergonomic Corrections

---

- Reduce elbow angle to 100 degrees: Bring your elbows closer to your body so they are bent at approximately 100 degrees, reducing strain on your upper back and arms.
- Straighten wrists to neutral position: Adjust your typing posture so your wrists remain straight, avoiding any upward or sideways bending to minimize wrist strain.
- Move keyboard 8 cm closer: Position your keyboard 8 cm closer to the edge of your desk to allow your elbows to rest at a more natural angle and reduce upper back tension.
- Raise laptop by 5 cm: Use a stand to elevate your laptop by 5 cm, helping to maintain a neutral wrist position while typing.

### Final Advice

---

Your upper back pain is severe and your posture shows significant elbow and wrist strain. Please implement corrections immediately and consult a healthcare provider if pain persists or worsens. Always perform any stretches or exercises slowly and stop if you feel pain.
