

POSTURA

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Red
- Wrist Deviation: Yellow
- Pelvic Tilt: Red

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

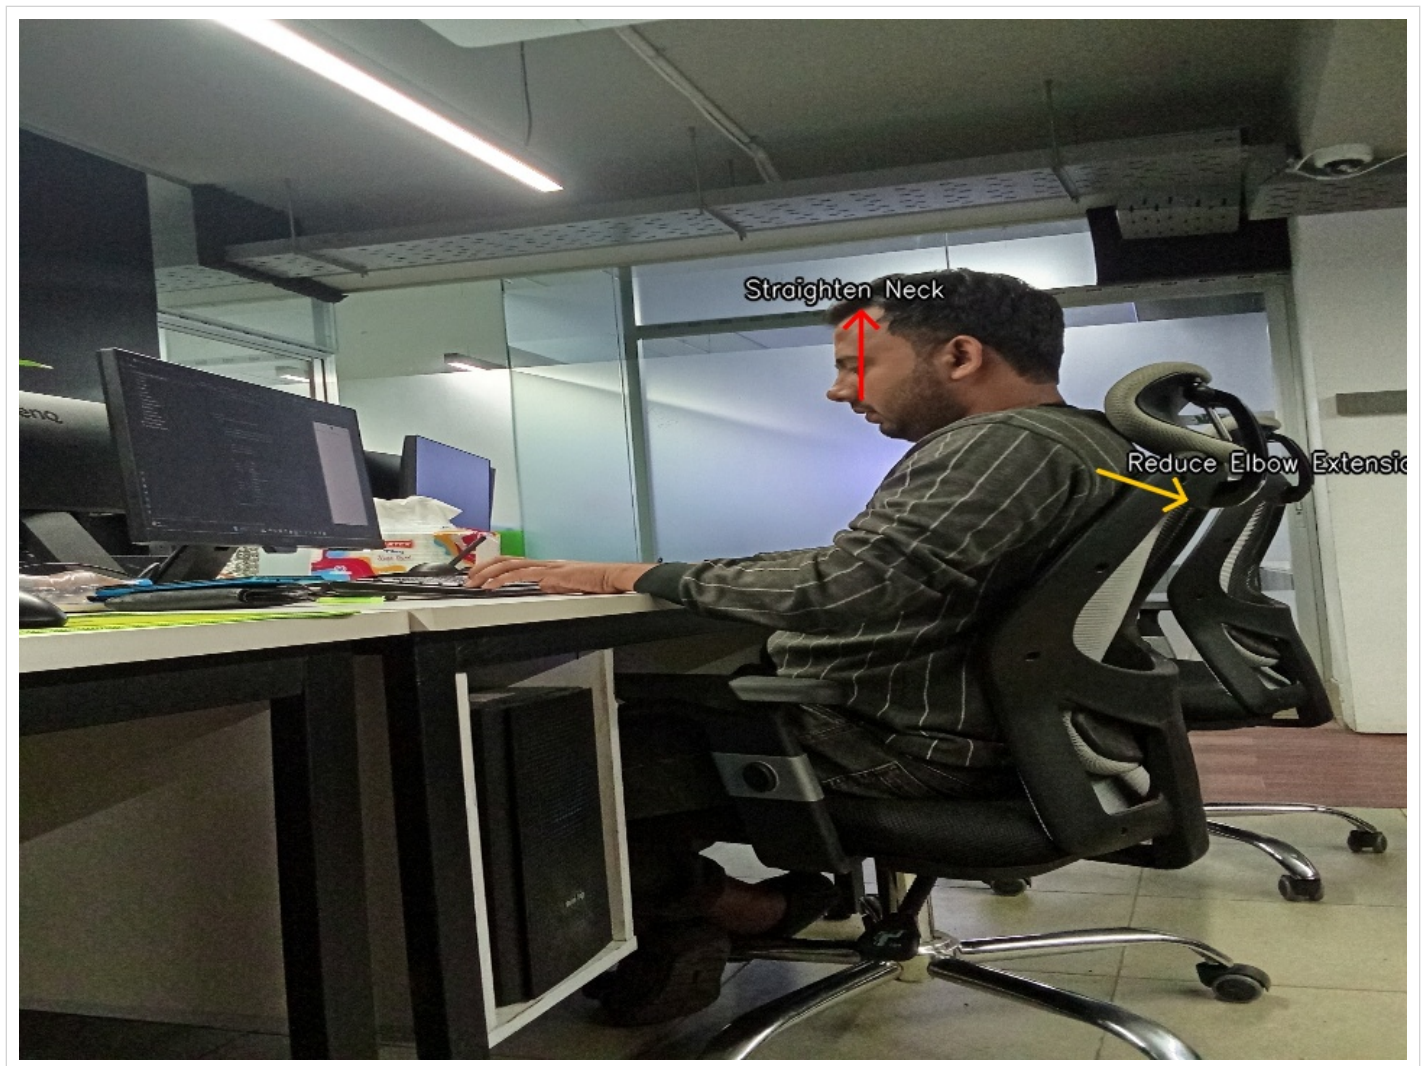

Main Pain Region(s): Neck, Elbows/Forearms, Hips/Glutes (VAS 8)

Posture & Ergonomic Corrections

- Raise monitor by 18 cm: Elevate your monitor so the top edge is at or just below eye level. This will reduce neck flexion from 65° to the ISO-recommended 0-20° range.
- Bend elbows to 90 degrees: Adjust your chair and keyboard height so your elbows are bent at 90°, not 155°, with forearms parallel to the floor.
- Reduce wrist deviation to 0 degrees: Keep wrists straight by aligning keyboard and mouse with your forearms, minimizing sideways bending.
- Sit with pelvis upright at 0 degrees: Adjust your chair backrest and sit fully back to reduce pelvic tilt from 64° to neutral/upright.
- Raise chair seat to 46 cm: Increase chair height so your feet remain flat and elbows reach 90° when typing.
- Move keyboard 10 cm closer: Bring keyboard closer to reduce arm extension and maintain elbows at 90°.

Final Advice

Your reported pain levels and posture risks are severe. Please consult a healthcare professional if pain persists or worsens. When performing any posture exercises or stretches, move slowly and stop immediately if you feel pain, tingling, or numbness.
