

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Red
- Wrist Deviation: Yellow
- Pelvic Tilt: Red

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Elbows/Forearms, Lower Back (VAS 8)

Future Risk: Medium – Risk of progression if unaddressed

Posture & Ergonomic Corrections

- Reduce Neck Flexion: Sit upright with your head balanced directly over your shoulders. Avoid bending your neck forward; keep your chin parallel to the floor and your gaze straight ahead.
- Correct Elbow Angle: Adjust your arm position so your elbows are bent at approximately 90–110°, keeping your forearms parallel to the floor and close to your body.
- Neutral Wrist Alignment: Keep your wrists straight and in line with your forearms while typing or using the mouse. Avoid bending your wrists up, down, or to the sides.
- Upright Pelvis Position: Sit with your pelvis in a neutral position, avoiding excessive forward or backward tilt. Your hips should be level with or slightly higher than your knees.
- Raise Monitor Height: Position your monitor so the top of the screen is at or just below eye level. This will reduce the need to flex your neck downward.
- Adjust Chair Height: Set your chair height so your elbows are at desk level, allowing your forearms to rest comfortably and your elbows to maintain a 90–110° angle.
- Keyboard and Mouse Placement: Place your keyboard and mouse close to your body and at the same height as your elbows to minimize wrist deviation and shoulder strain.
- Support Pelvis and Lower Back: Use a lumbar support cushion or adjust your chair's lumbar support to maintain the natural curve of your lower back and promote a neutral pelvic tilt.

Final Advice

Your current posture and workstation setup are causing significant strain, especially to your upper back and

neck. Immediate ergonomic adjustments and consistent exercise are strongly recommended to reduce pain and prevent further injury. If pain persists or worsens, consult a healthcare professional.
