

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Red
- Wrist Deviation: Red
- Pelvic Tilt: Red

Workstation Analysis

Pain & Risk Summary

Average Pain Level: 8

Main Pain Region(s): Neck, Elbows/Forearms, Wrists/Hands, Lower Back (VAS 8)

Future Risk: Medium – Risk of progression if unaddressed

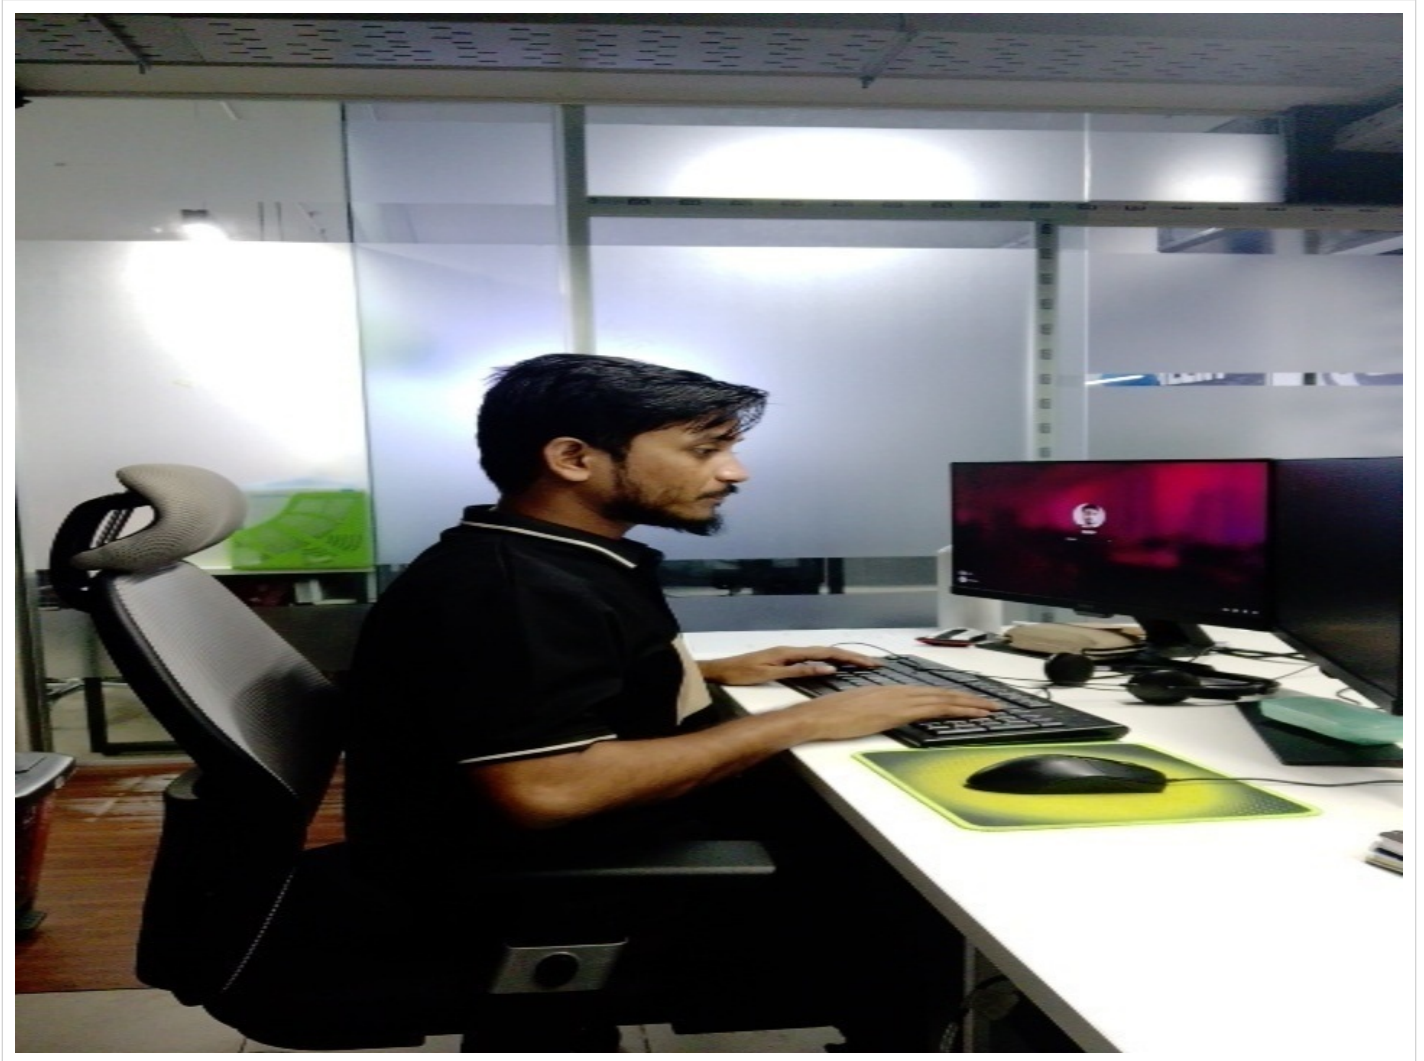

Posture & Ergonomic Corrections

- Reduce Neck Flexion: Sit upright with your head aligned over your shoulders. Adjust your gaze so your chin is parallel to the floor and avoid bending your neck forward. Keep your monitor at eye level to minimize neck flexion.
- Correct Elbow Angle: Adjust your chair and desk height so your elbows are bent at approximately 90–100°, with your forearms parallel to the floor and wrists straight while typing.
- Neutral Wrist Position: Keep your wrists in a straight, neutral position when typing or using the mouse. Avoid bending your wrists upwards or sideways.
- Pelvic Alignment: Sit back fully in your chair with your pelvis neutral (not tilted forward or backward). Use the chair's backrest for support and keep your feet flat on the floor.
- Raise Monitor Height: Position your monitor so the top edge is at or just below eye level. Use a monitor riser (8–12 cm) to achieve this and reduce neck flexion.
- Adjust Chair and Desk Height: Set your chair and desk so your elbows are at a 90–100° angle when typing, with forearms parallel to the floor. Adjust armrests if available.
- Keyboard and Mouse Placement: Place your keyboard and mouse close to your body and at the same height as your elbows to maintain neutral wrist and elbow positions.
- Support Pelvis and Lower Back: Ensure your chair provides adequate lumbar support. If not, use a lumbar cushion to maintain a neutral pelvic tilt.

Final Advice

Your assessment indicates high ergonomic risk, especially for your upper back, neck, wrists, and elbows.

Immediate workstation adjustments and posture corrections are essential. If pain persists or worsens, consult a healthcare professional.
