

POSTURA

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Yellow
- Wrist Deviation: Red
- Pelvic Tilt: Green

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Wrists/Hands (VAS 8)

Posture & Ergonomic Corrections

- Reduce Neck Flexion: Sit upright with your head aligned over your shoulders. Avoid bending your neck forward; instead, keep your chin parallel to the floor and your gaze straight ahead.
- Neutral Wrist Alignment: Keep your wrists straight and in line with your forearms when typing or using the mouse. Avoid bending your wrists upwards or to the sides.
- Optimal Elbow Angle: Adjust your chair or desk height so your elbows are bent at approximately 90–100°, with your forearms parallel to the floor and close to your body.
- Raise Monitor Height: Elevate your monitor so the top of the screen is at or just below eye level. This will reduce the need to bend your neck forward.
- Keyboard and Mouse Placement: Position your keyboard and mouse so they are close to the edge of the desk and at the same height as your elbows. This helps maintain neutral wrist and elbow positions.

Final Advice

Your assessment shows significant ergonomic risks, especially for your upper back, neck, and wrists. Address workstation setup and posture immediately to reduce pain and prevent further issues. If pain persists or worsens, consult a healthcare professional.
