

POSTURA

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Green
- Shoulder Elevation: Green
- Elbow Angle: Red
- Wrist Deviation: Red
- Pelvic Tilt: Yellow

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Elbows/Forearms, Wrists/Hands (VAS 8)

Posture & Ergonomic Corrections

- Correct Elbow Angle: Adjust your arm position so that your elbows are bent at approximately 90–110°. Avoid extending your arms too far forward or outward while typing or using the mouse.
- Neutral Wrist Alignment: Keep your wrists straight and in line with your forearms while typing and using the mouse. Avoid bending your wrists upwards, downwards, or to the sides.
- Pelvic Neutrality: Sit with your pelvis in a neutral position, avoiding excessive forward or backward tilt. Your hips should be level with or slightly higher than your knees.
- Bring Keyboard and Mouse Closer: Position your keyboard and mouse so your elbows remain close to your body and bent at 90–110°. This reduces arm extension and shoulder strain.
- Use an External Keyboard and Mouse: Connect an external keyboard and mouse to your laptop to allow for better arm and wrist positioning, minimizing deviation and extension.
- Adjust Chair Height: Ensure your chair height allows your feet to rest flat on the floor and your elbows to be at desk height when typing.

Final Advice

Your assessment indicates high ergonomic risk for your elbows and wrists, with significant upper back discomfort. Immediate workstation adjustments and regular exercises are recommended. If symptoms persist or worsen, consult a healthcare professional.
