

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Green
- Shoulder Elevation: Green
- Elbow Angle: Red
- Wrist Deviation: Red
- Pelvic Tilt: Yellow

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Elbows/Forearms, Wrists/Hands (VAS 8)

Posture & Ergonomic Corrections

- Correct Elbow Angle: Adjust your sitting position so your elbows are bent at 90–110°, with forearms parallel to the floor and close to your body. Avoid extending your arms forward or outward.
- Neutral Wrist Alignment: Keep your wrists straight and in line with your forearms while typing or using the mouse. Avoid bending your wrists up, down, or sideways.
- Pelvic Neutrality: Sit with your pelvis in a neutral position—avoid tilting forward or backward. Your hips should be level with or slightly higher than your knees.
- Keyboard and Mouse Placement: Position your keyboard and mouse so they are close to the edge of the desk, allowing your elbows to remain at your sides and at a 90–110° angle.
- Laptop Ergonomics: Use an external keyboard and mouse with your laptop to prevent excessive wrist deviation and elbow extension.

Final Advice

Your assessment shows high ergonomic risk for your upper back and wrists, with significant pain reported. Immediate workstation adjustments and posture corrections are strongly recommended. If pain or tingling worsens or persists, consult a healthcare professional.
