

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Yellow
- Shoulder Elevation: Yellow
- Elbow Angle: Red
- Wrist Deviation: Red
- Pelvic Tilt: Red

Workstation Analysis

- Monitor: MonitorHeight: Red
- Monitor: ViewingDistance: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Elbows/Forearms, Wrists/Hands, Hips/Glutes (VAS 8)

Posture & Ergonomic Corrections

- Correct Elbow Angle: Adjust your sitting position so your elbows are bent at 90–100°, keeping your forearms parallel to the floor and close to your body. Avoid extending elbows outward or upward.
- Neutral Wrist Alignment: Keep wrists straight and in line with your forearms while typing or using the mouse. Avoid bending wrists up, down, or to the sides.
- Reduce Pelvic Tilt: Sit with your hips fully back in the chair and feet flat on the floor. Use a lumbar support cushion if needed to maintain a neutral pelvis and support your lower back.
- Lower Shoulder Elevation: Relax your shoulders and keep them level, not hunched or raised. Adjust chair or armrests so your shoulders remain relaxed during work.
- Minimize Neck Flexion: Keep your head upright with your chin tucked slightly in, so your neck remains in a neutral position. Avoid leaning forward or looking down at the screen.
- Raise Monitor Height: Elevate your monitor so the top of the screen is at or just below eye level. This will help keep your neck in a neutral position and reduce strain.
- Adjust Armrest Height: Set armrests so your elbows rest comfortably at a 90–100° angle and your shoulders are relaxed. If your chair lacks armrests, consider adding adjustable ones.
- Add Lumbar Support: Use a lumbar cushion or adjust your chair's lumbar support to maintain the natural curve of your lower back and reduce pelvic tilt.

Final Advice

Your assessment shows significant ergonomic risks, especially for your upper back, neck, wrists, and elbows.

Prioritize workstation adjustments and posture corrections immediately. If pain persists or worsens, consult a healthcare professional.
