

POSTURA

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Yellow
- Shoulder Elevation: Yellow
- Elbow Angle: Red
- Wrist Deviation: Yellow
- Pelvic Tilt: Red

Workstation Analysis

- Monitor: MonitorHeight: Red
- Monitor: ViewingDistance: Green

Pain & Risk Summary

Average Pain Level: 7

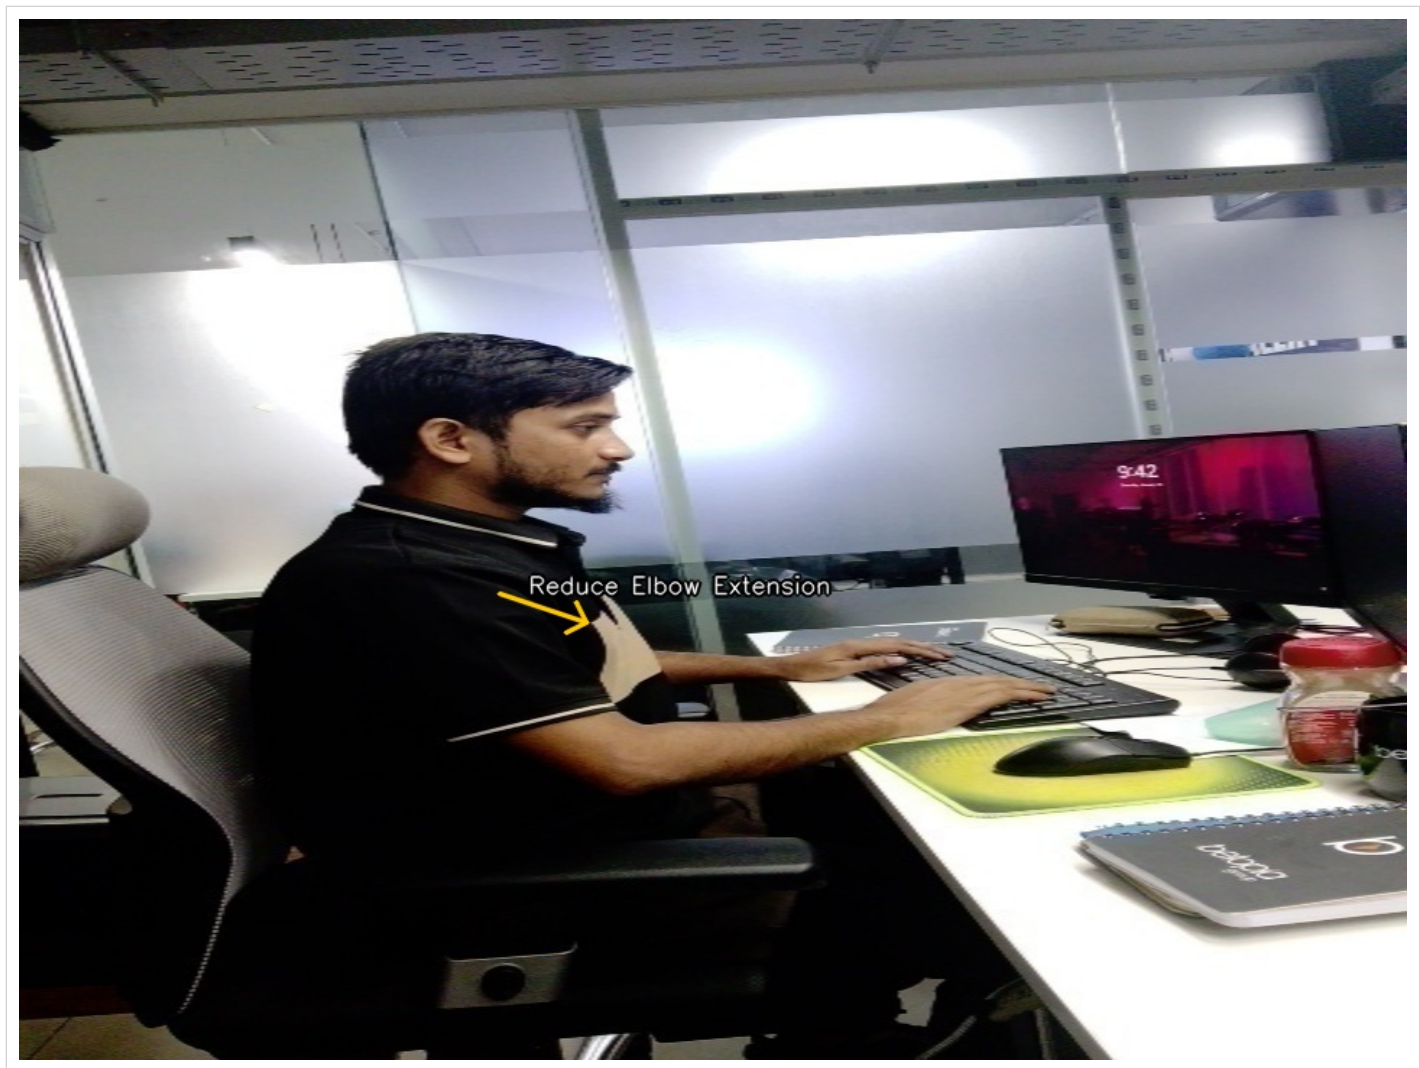

Main Pain Region(s): Neck, Elbows/Forearms, Hips/Glutes (VAS 8)

Posture & Ergonomic Corrections

- Reduce elbow angle to 100°: Adjust your chair and keyboard position so your elbows are bent at approximately 100°, keeping your forearms parallel to the floor and close to your body.
- Decrease pelvic tilt to 0–5°: Sit back fully in your chair with your pelvis neutral, using lumbar support to maintain a slight natural curve (0–5° tilt) in your lower back.
- Lower shoulder elevation below 5°: Relax your shoulders and adjust armrests so your shoulders remain low and relaxed, aiming for less than 5° elevation.
- Raise monitor by 25 cm: Increase your monitor height by 25 cm so the top of the screen is at or just below eye level, reducing neck flexion.
- Adjust chair height to 46 cm: Set your chair seat height to 46 cm so your feet are flat on the floor and your thighs are parallel to the ground.

Final Advice

Your assessment shows significant ergonomic risks, especially for your upper back and lower back. Address workstation and posture corrections promptly. If pain persists or worsens, consult a healthcare professional.
