

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk
- Shoulder Elevation: Green risk
- Elbow Angle: Red risk
- Wrist Deviation: Yellow risk
- Pelvic Tilt: Red risk

Workstation Analysis

- Chair: SeatDepth: Green risk

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Elbows/Forearms, Lower Back (VAS 8)

Future Risk: Medium – Risk of progression if unaddressed

Posture & Ergonomic Corrections

- Reduce Neck Flexion: Sit upright with your head balanced directly over your shoulders. Avoid bending your neck forward; keep your chin level and eyes looking straight ahead.
- Correct Elbow Angle: Adjust your arm position so your elbows are bent at approximately 90–100°, keeping your forearms parallel to the floor and close to your body.
- Neutral Wrist Position: Keep your wrists straight and aligned with your forearms while typing or using the mouse. Avoid bending your wrists up, down, or to the sides.
- Pelvic Alignment: Sit with your hips and pelvis upright, not tilted forward. Ensure your lower back is supported and your feet are flat on the floor.
- Raise Monitor Height: Elevate your monitor so the top of the screen is at or just below eye level. This will reduce the need to bend your neck forward.
- Adjust Chair Height and Armrests: Set your chair height so your elbows are at desk level and your forearms rest comfortably on the desk or armrests, maintaining a 90–100° elbow angle.
- Keyboard and Mouse Placement: Position your keyboard and mouse close to your body and at the same height as your elbows to minimize wrist deviation and shoulder strain.
- Lumbar Support: Use a lumbar cushion or adjust your chair's backrest to support your lower back and maintain a neutral pelvic tilt.

Final Advice

Your assessment shows severe neck flexion, excessive elbow angle, and significant pelvic tilt, all of which violate

ISO 9241-5 and are linked to your reported pain. Prioritize monitor and lumbar support adjustments, and perform the recommended exercises regularly. If pain persists or worsens, consult a healthcare professional.
