

POSTURA

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Yellow
- Wrist Deviation: Red
- Pelvic Tilt: Green

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Wrists/Hands (VAS 8)

Future Risk: Medium – Risk of progression if unaddressed

Posture & Ergonomic Corrections

- Reduce Neck Flexion: Sit upright with your head balanced directly over your shoulders. Avoid bending your neck forward; keep your chin parallel to the floor and your gaze straight ahead.
- Neutral Wrist Alignment: Keep your wrists straight and in line with your forearms while typing. Avoid bending your wrists upwards or to the sides.
- Optimal Elbow Angle: Adjust your arm position so your elbows are bent at approximately 90–100°, close to your body, and relaxed.
- Elevate Laptop Screen: Use a monitor riser or stack books to raise your laptop screen so the top edge is at eye level. This reduces the need to bend your neck forward.
- External Keyboard and Mouse: Connect an external keyboard and mouse to your laptop. Position them so your wrists remain straight and your elbows are at a comfortable angle.

Final Advice

Your upper back pain is significant and combined with high wrist and neck strain. Prioritize workstation adjustments and posture corrections immediately. If pain persists or worsens, consult a healthcare professional.
