

POSTURA

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red
- Shoulder Elevation: Green
- Elbow Angle: Yellow
- Wrist Deviation: Red
- Pelvic Tilt: Green

Workstation Analysis

- Chair: SeatDepth: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Wrists/Hands (VAS 8)

Posture & Ergonomic Corrections

- Reduce Neck Flexion: Sit upright with your head aligned over your shoulders. Avoid bending your neck forward; instead, keep your chin parallel to the floor and your gaze straight ahead.
- Neutral Wrist Position: Keep your wrists straight and in line with your forearms while typing. Avoid bending your wrists upwards or sideways.
- Optimize Elbow Angle: Adjust your arm position so your elbows are bent at approximately 90–100 degrees and remain close to your body.
- Raise Monitor Height: Elevate your laptop screen so the top edge is at or just below eye level. Use a monitor riser or stack sturdy books to achieve the correct height.
- Use External Keyboard and Mouse: Connect an external keyboard and mouse to your laptop. Position them so your wrists remain straight and your elbows are at a comfortable angle.

Final Advice

Your workstation setup is causing significant upper back and wrist strain, with moderate neck risk. Prioritize raising your monitor and using an external keyboard/mouse. Perform the recommended exercises regularly, and consider consulting a healthcare professional if pain persists or worsens.
