

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture: RED (high risk, multiple severe violations and high pain in wrists/hands and neck). Workstation: RED (critical monitor height violation, poor input device arrangement). Immediate corrective action required.

Exercise Recommendations

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with your other hand for 15–20 seconds. Repeat on both sides.

Neck retractions: Gently tuck your chin and pull your head back, keeping your eyes level. Hold for 5 seconds, repeat 10 times.

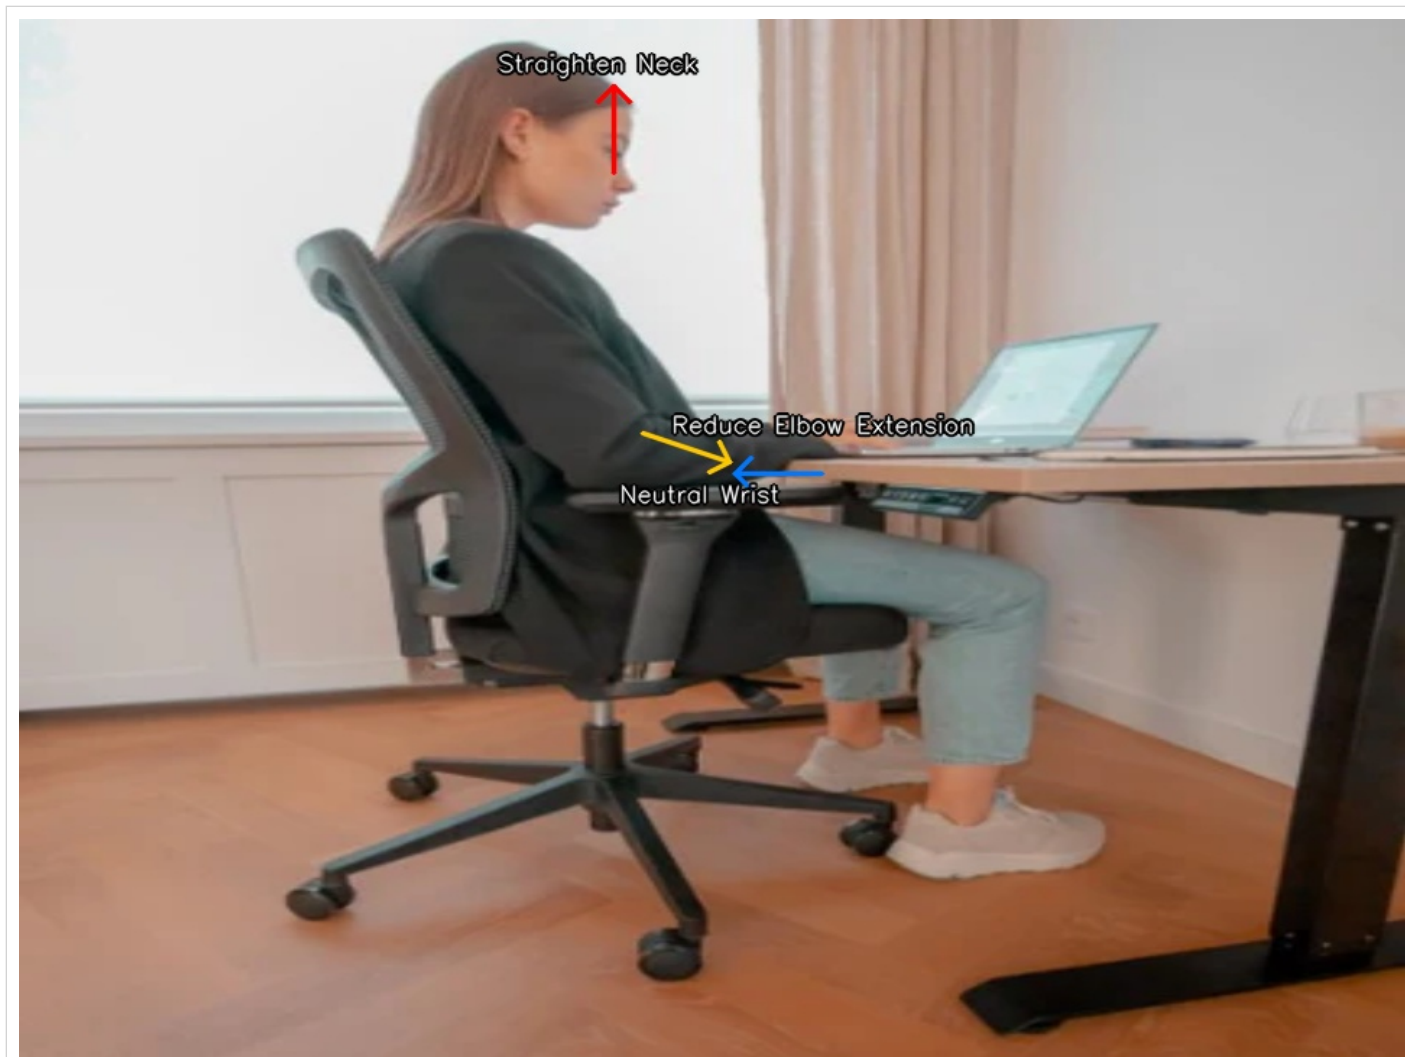

Shoulder blade squeezes: Sit upright and squeeze your shoulder blades together for 5 seconds, repeat 10 times.

Seated upper back stretch: Cross your arms in front of you and gently round your upper back, holding for 15 seconds.

Standing break: Every hour, stand up, shake out your hands, and walk for 1–2 minutes to promote circulation and relieve static posture.

Final Advice

Your current posture and workstation setup present a high risk for musculoskeletal injury, especially to your wrists/hands and neck. Immediate ergonomic adjustments and regular breaks are essential. If pain or tingling persists, consult a healthcare professional.
