

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture risk: RED (severe wrist, neck, and elbow strain). Workstation risk: RED (critical monitor height violation, poor device setup). Immediate ergonomic intervention required.

Exercise Recommendations

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with your other hand for 15–30 seconds per side.

Neck retractions: Gently tuck your chin and pull your head back to align ears over shoulders, holding for 5 seconds. Repeat 10 times.

Upper back extension: Interlace fingers behind your head and gently arch backward, opening the chest. Hold for 10 seconds, repeat 5 times.

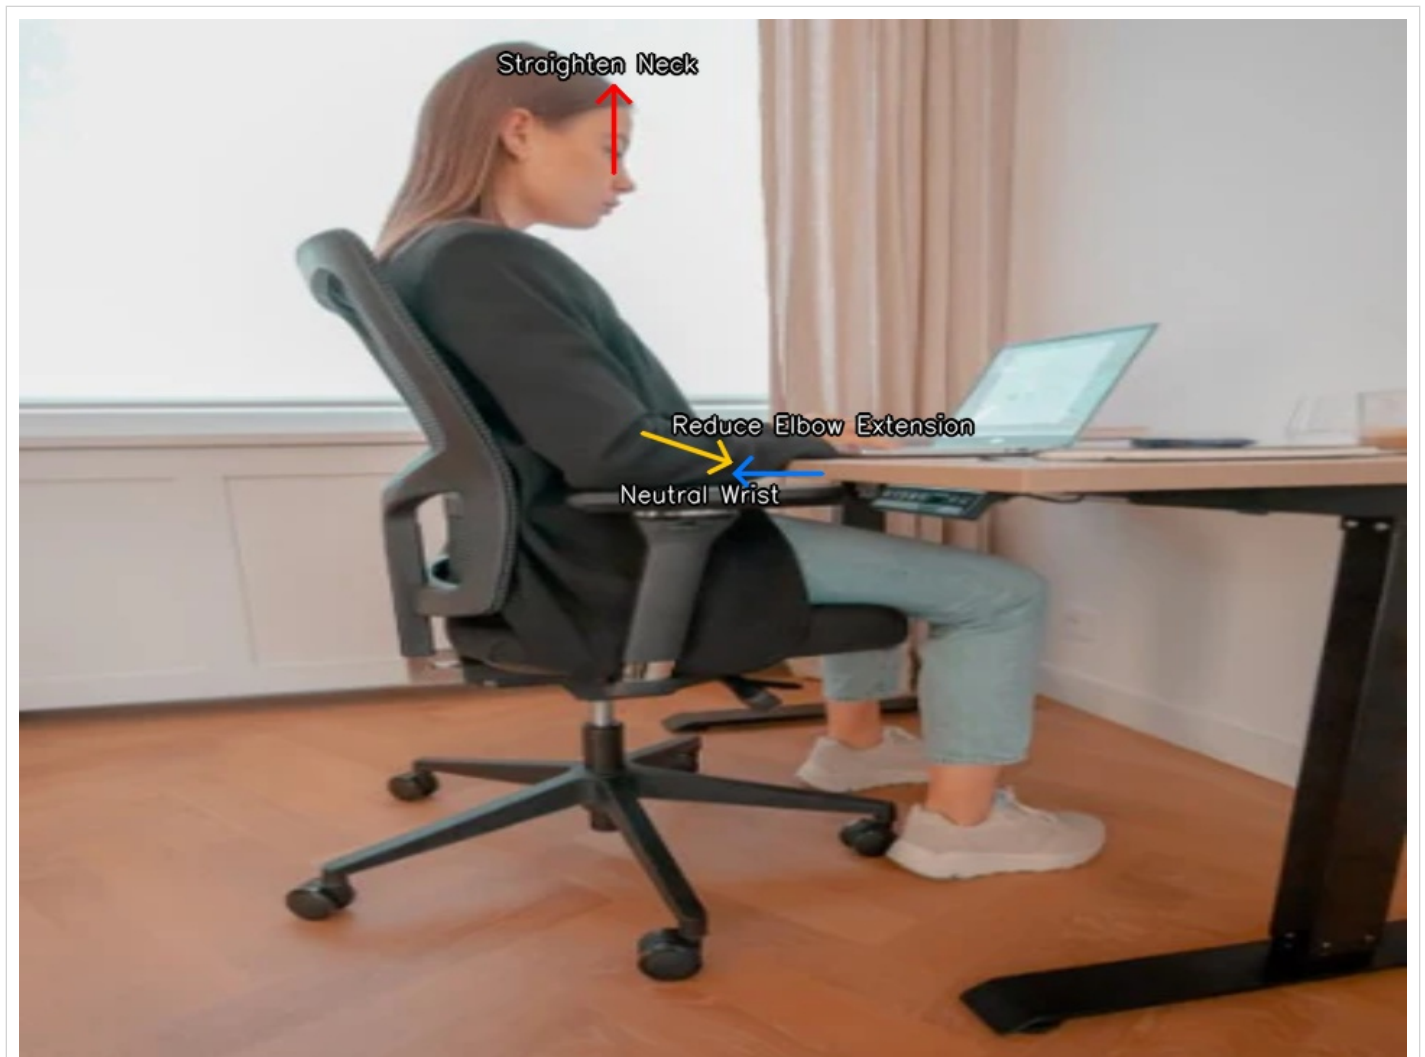

Seated pelvic tilts: Rock your pelvis forward and backward while seated to mobilize your lower back. Repeat 10–15 times.

Forearm stretches: Extend your arm, palm down, and gently press on the back of your hand to stretch the forearm muscles. Hold for 15 seconds per side.

Final Advice

Your current setup poses a high risk for repetitive strain injuries, especially to your wrists and neck. Immediate workstation adjustments and posture corrections are essential. Prioritize using external input devices and elevating your screen. Incorporate recommended exercises and take breaks every 30–60 minutes to reduce

discomfort and prevent further injury.
