

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture risk: RED (severe, due to extreme wrist deviation, neck flexion, and elbow angle, with high pain in wrists/hands). Workstation risk: RED (monitor height violation causing neck strain; lack of external input devices). Immediate ergonomic intervention required.

Exercise Recommendations

Wrist stretches: Extend one arm with palm up, gently pull fingers back with the other hand for 15 seconds per side.

Neck retractions: Sit upright, gently tuck chin and pull head back to align ears over shoulders. Hold for 5 seconds, repeat 10 times.

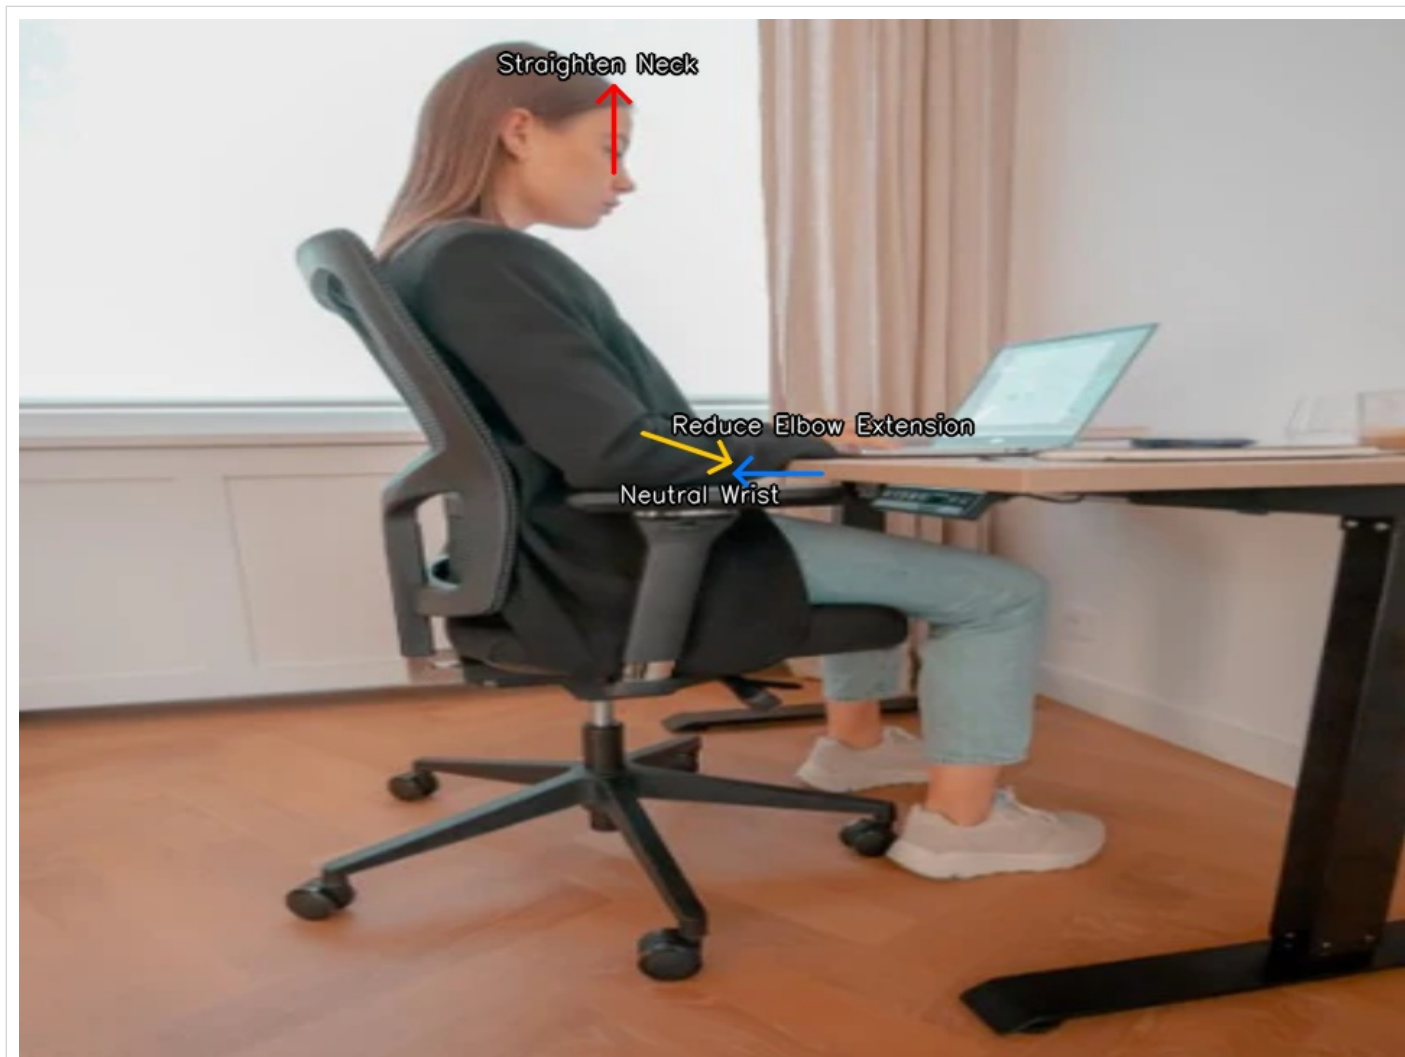

Shoulder blade squeezes: Sit or stand, squeeze shoulder blades together and hold for 5 seconds. Repeat 10 times.

Forearm stretches: Extend arm, palm down, gently pull fingers toward the floor with opposite hand for 15 seconds per side.

Seated spinal twists: Sit upright, twist gently to each side, holding for 10 seconds to relieve upper back tension.

Final Advice

Your current posture and workstation setup present severe ergonomic risks, especially to your wrists and neck, which is consistent with your reported pain and symptoms. Immediate workstation adjustments and posture corrections are required to prevent further injury. If pain or tingling persists, consult a healthcare professional.
