

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture risk: RED (critical, multiple severe violations and high pain in wrists/hands). Workstation risk: RED (critical, monitor height violation causing neck/upper back strain).

Exercise Recommendations

Wrist stretches: Gently extend your arm, palm up, and use your other hand to pull fingers back for 15 seconds. Repeat both sides.

Neck retractions: Gently pull your chin straight back (not down) to align your head over your shoulders. Hold for 5 seconds, repeat 10 times.

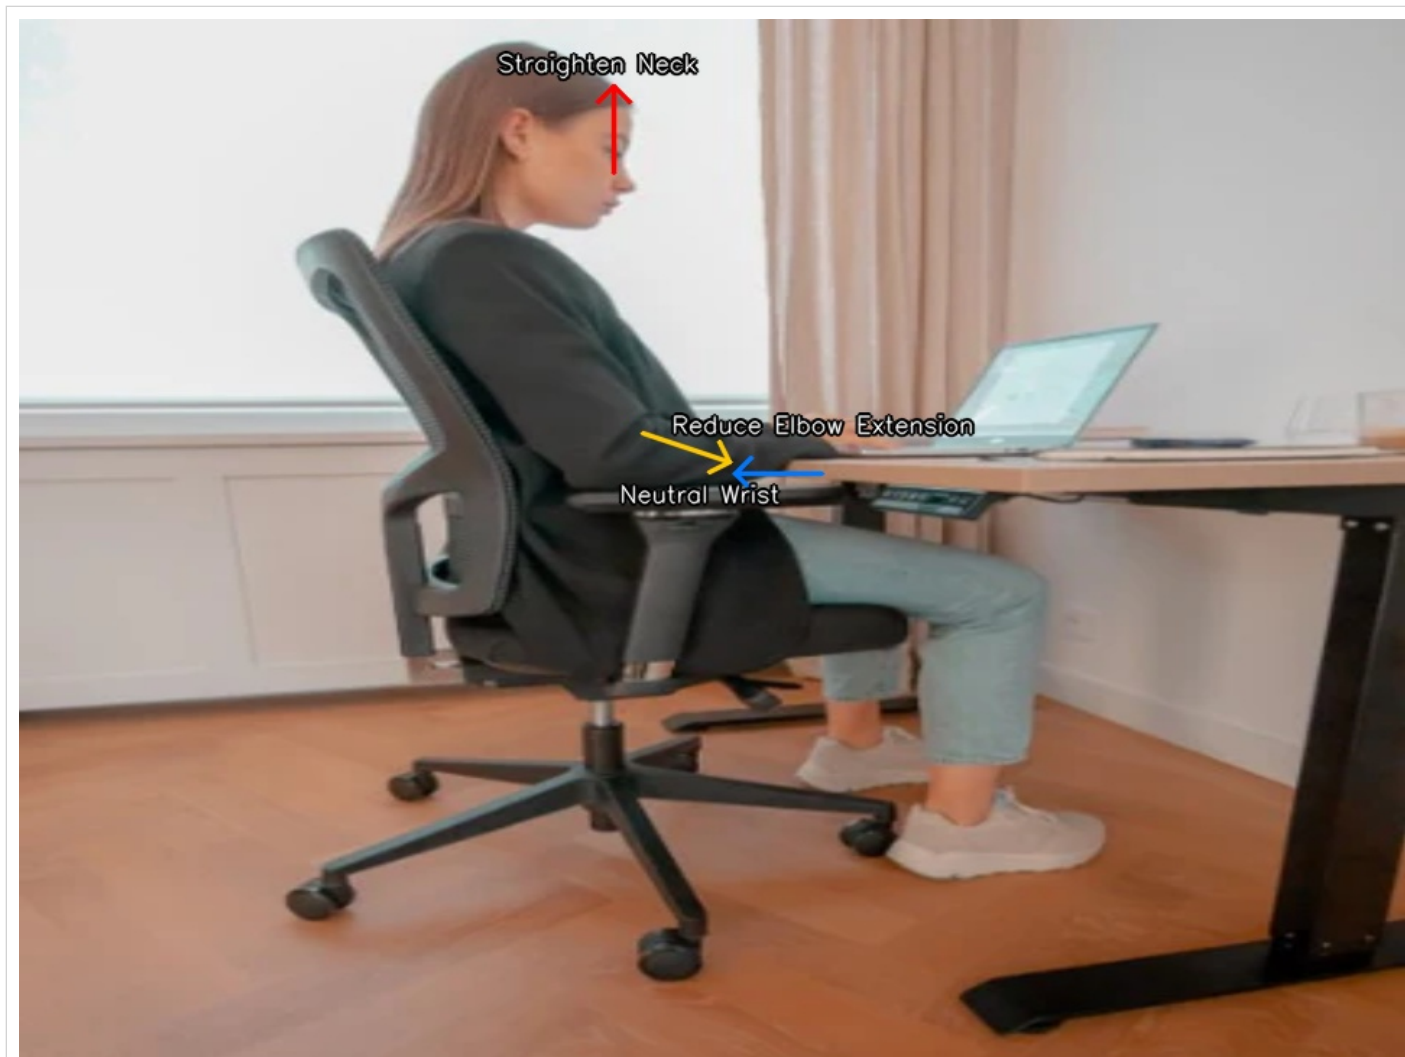

Shoulder blade squeezes: Sit upright, squeeze shoulder blades together, hold for 5 seconds, repeat 10 times.

Forearm stretches: Extend one arm, palm down, and gently pull the hand down and back with the other hand. Hold for 15 seconds, repeat both sides.

Seated pelvic tilts: Sit upright, gently tilt pelvis forward and backward to mobilize lower back. Repeat 10 times.

Final Advice

Your current posture and workstation setup present critical ergonomic risks, especially for your wrists/hands and neck. Immediate adjustments are necessary to prevent worsening symptoms and potential long-term injury. Prioritize raising your monitor, using external input devices, and maintaining neutral joint positions. Incorporate the recommended exercises into your daily routine and take breaks at least every hour.
