

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Yellow
- Shoulder Elevation: Yellow
- Elbow Angle: Red
- Wrist Deviation: Red
- Pelvic Tilt: Red

Workstation Analysis

- Monitor: MonitorHeight: Red
- Monitor: ViewingDistance: Green

Pain & Risk Summary

Average Pain Level: 7

Main Pain Region(s): Neck, Elbows/Forearms, Wrists/Hands, Hips/Glutes (VAS 8)

Posture & Ergonomic Corrections

- Reduce wrist deviation to under 5°: Adjust your hand and forearm position so your wrists remain straight and aligned with your forearms while typing or using the mouse. Avoid bending wrists sideways.
- Lower elbow angle to 100°: Bring your chair closer to the desk and lower armrests so your elbows are bent at about 100°, keeping forearms parallel to the floor and relaxed.
- Reduce pelvic tilt to under 10°: Sit back fully in your chair with your pelvis neutral, using lumbar support to maintain a slight natural curve in your lower back.
- Raise monitor by 25 cm: Place your monitor on a riser or stack of books so the top of the screen is at or just below eye level, reducing neck flexion.

Final Advice

Your upper back pain is severe and persistent. Please consult a healthcare professional for further evaluation. Implement workstation and posture corrections immediately to reduce strain, and use recommended exercises and equipment to support recovery.
