

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture: red (high risk due to neck flexion, elbow angle, and wrist deviation). Workstation: red (monitor height is a critical violation).

Exercise Recommendations

Neck retraction: Gently pull your head straight back, keeping your chin tucked, to align your ears over your shoulders. Hold for 5 seconds, repeat 10 times.

Shoulder rolls: Roll your shoulders up, back, and down in a circular motion to relieve tension. Repeat 10 times.

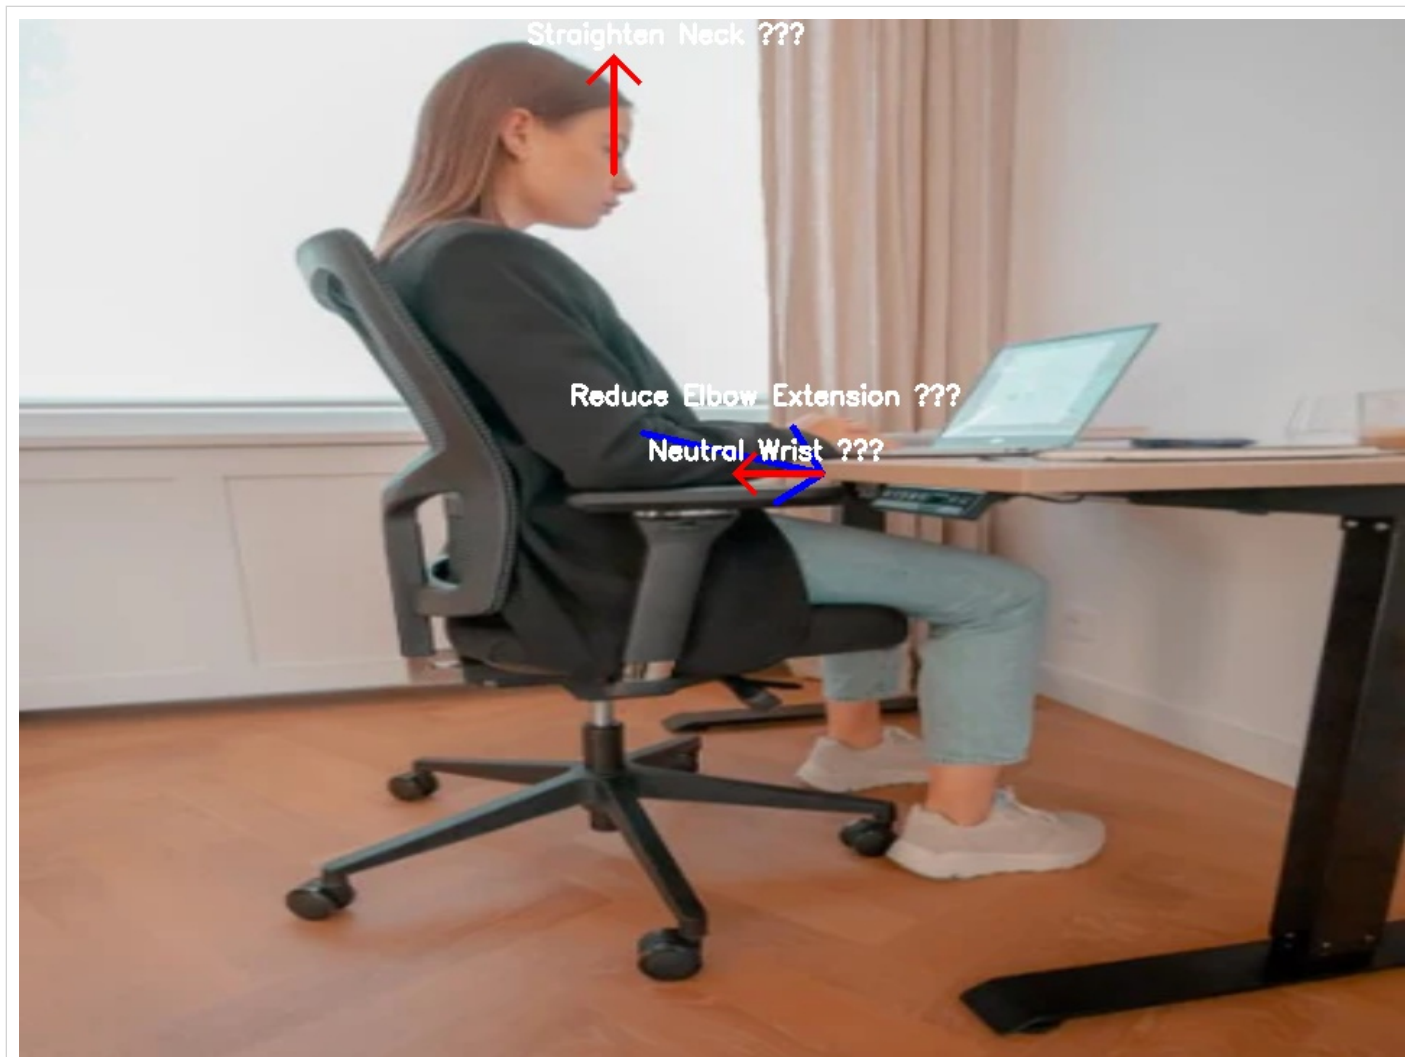

Wrist stretches: Extend your arm in front, palm up, and gently pull back on your fingers with your other hand to stretch the wrist. Hold for 15 seconds each side.

Seated pelvic tilts: While sitting, gently tilt your pelvis forward and backward to mobilize your lower back. Repeat 10 times.

Elbow flexion-extension: Bend and straighten your elbows slowly to improve joint mobility. Repeat 10 times per arm.

Final Advice

Immediate workstation adjustments are necessary to address critical risks, especially monitor height and wrist posture. Combine these changes with regular posture checks and ergonomic exercises to reduce discomfort and prevent injury.
