

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 158.16467546307916°)
- Shoulder Elevation: Green risk (Angle: 3.4036803245544434°)
- Elbow Angle: Red risk (Angle: 130.18951456579921°)
- Wrist Deviation: Red risk (Angle: 179.17142911307909°)
- Pelvic Tilt: Yellow risk (Angle: 14.805450439453125°)

Workstation Analysis

Monitor:

- MonitorHeight: Red (Δ 118.70453041791916)
- ViewingDistance: Green (Δ 260.32965087890625)

Chair:

- SeatDepth: Green (Δ 95.02325439453125)

Risk Summary

Posture: red (high risk due to neck flexion, elbow angle, and wrist deviation). Workstation: red (monitor height is a critical issue).

Exercise Recommendations

Neck retractions: Gently pull your chin straight back, keeping your head level, to strengthen neck stabilizers.

Shoulder rolls: Roll your shoulders backward and downward 10 times to relieve tension.

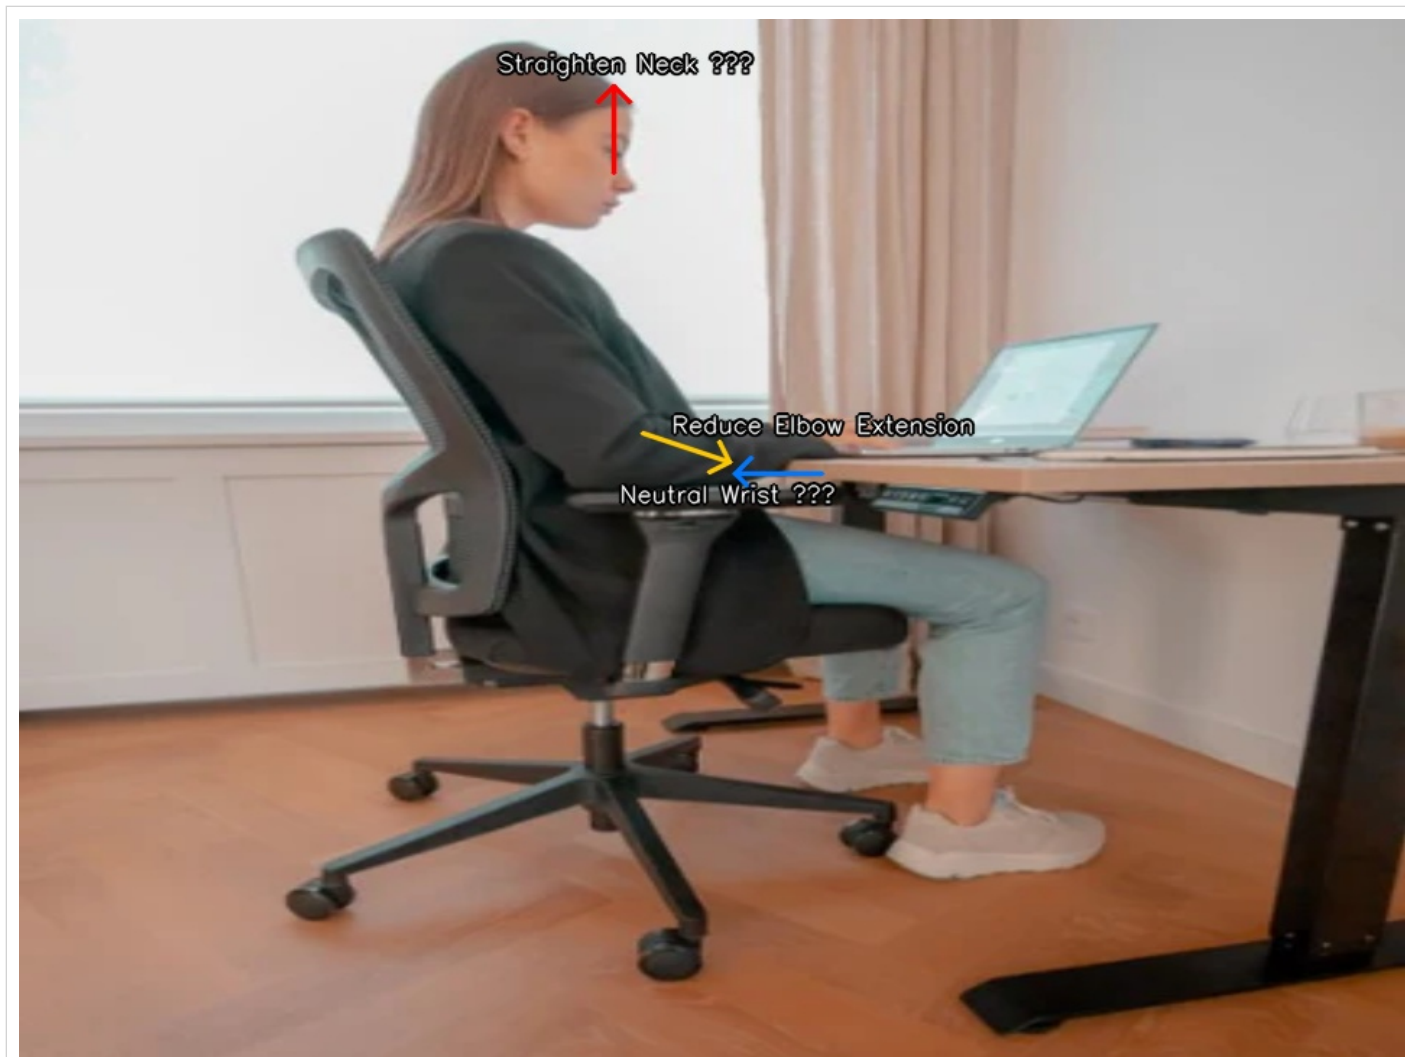

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with your other hand to stretch the forearm and wrist.

Seated pelvic tilts: Rock your pelvis forward and backward while seated to improve lumbar mobility.

Elbow flexor stretches: Extend your arm and gently pull your hand downward to stretch the muscles on the front of your elbow.

Final Advice

Your current setup poses significant ergonomic risks, especially to your neck, wrists, and elbows. Immediate adjustments to your monitor height and working posture are essential to reduce strain and prevent injury. Incorporate the recommended exercises and reassess your workstation regularly.
