

Ergonomics Evaluation Report

Posture Analysis

- Neck Flexion: Red risk (Angle: 124.1489062493626°)
- Shoulder Elevation: Green risk (Angle: 1.0910367965698242°)
- Elbow Angle: Red risk (Angle: 169.3556748498566°)
- Wrist Deviation: Red risk (Angle: 141.87331032777166°)
- Pelvic Tilt: Green risk (Angle: 2.8782033920288086°)

Workstation Analysis

Chair:

- SeatDepth: Green (Δ 212.4368438720703)

Risk Summary

Posture risk: RED (severe violations in neck, elbow, and wrist positions). Workstation risk: YELLOW (main issue is lack of external keyboard/mouse and improper screen height). Immediate ergonomic intervention is required.

Exercise Recommendations

Neck retraction: Gently pull your head straight back (as if making a double chin) and hold for 5 seconds. Repeat 10 times to reduce neck flexion strain.

Wrist stretches: Extend your arm, palm up, and gently pull back on your fingers with the other hand for 15 seconds. Repeat on both sides.

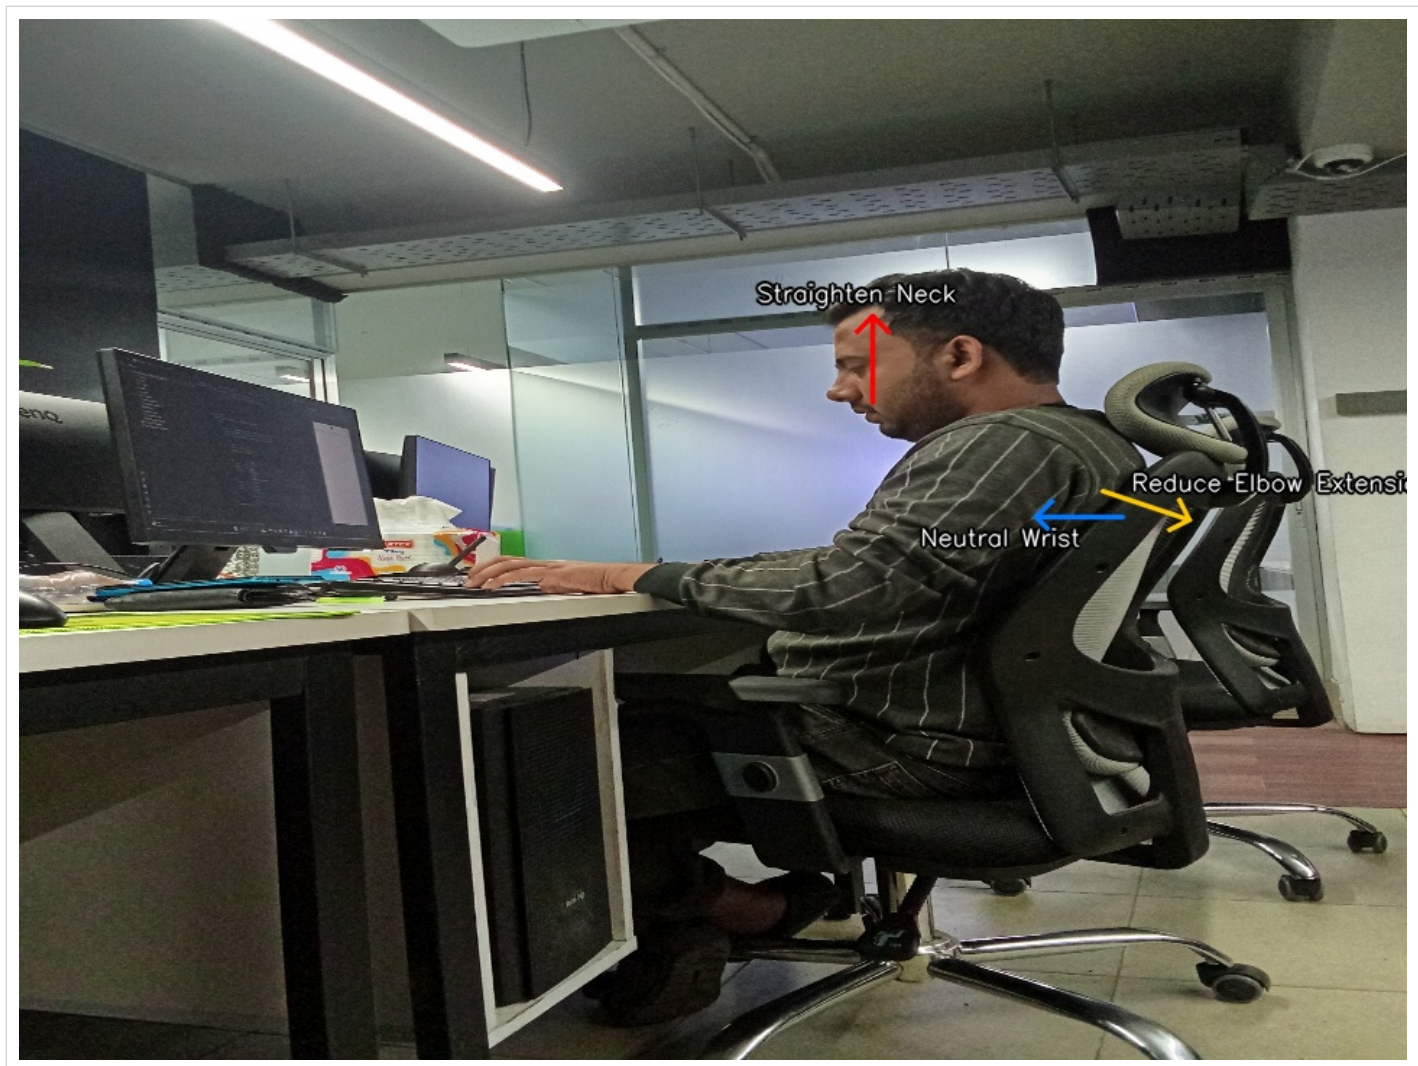

Seated upper back extension: Sit tall, clasp hands behind your head, and gently arch your upper back over the backrest. Hold for 10 seconds, repeat 5 times.

Shoulder rolls: Roll your shoulders up, back, and down in a circular motion 10 times to relieve upper back and shoulder tension.

Forearm stretches: Extend one arm in front, palm down, and gently press the back of your hand with the other hand to stretch the forearm. Hold for 15 seconds each side.

Final Advice

No final advice available.
